

Waste:

Aim: “to minimise waste and increase recycling”

London Luton Airport, in common with all major airports, is a significant generator of waste. In order to deliver against the above aim, LLAOL commits to:

- increase recycling by 5% in 2009.
- adopting innovative solutions to waste management, where practical.
- complying with ‘Duty of Care’ and other relevant waste legislation.
- closely monitoring the production and disposal of waste within LLAOL’s own operating areas.
- increasing staff, business partner and passenger awareness of waste minimisation by internal communication and promotion of recycling.
